

SpeedScale™

Fast and Accurate

Truck Scale Controller

Improve Performance: Produce accurate weigh records, generate reports on demand, and prevent vehicle overloads

Improve Profitability: Automatic, hands-free data collection eliminates the need for a scale house attendant

Speed Weigh Processing: SpeedScale can potentially triple the number of trucks weighed per day

Reduce Human Error: SpeedScale provides automatic, paperless data collection

Prevent Fraud: Automatic data collection prevents falsification of load information

Retrofit: SpeedScale easily retrofits into existing billing and tracking software

When Weight Counts,

you need more than a scale!

SpeedScale™ Overview

SpeedScale simplifies your corporate weighing operations by automating your weigh scale stations.

SpeedScale has been in operation in Fife, WA, for five years and currently provides service to 56 trucking companies seeking unattended, hands-free, automatic, multi-axle weighs for their fleet vehicles. SpeedScale uses IDmicro's long-range Remote Intelligent Communications (RIC) tags attached to participating vehicles to provide unique identification and scale authorization at distances up to 40 feet. The SpeedScale service removes the hassle of paperwork and on-site payment for individual drivers while maintaining a reliable electronic copy of each transaction for individual participants. Individual weighing transactions can be printed on a receipt and/or electronically passed to the SpeedScale network service provider for processing and invoicing on a monthly basis. Individual account information can be viewed and maintained via the web.

Site Controller Specification

800 MHz PC
256 MB Random Access Memory (RAM)
20 GB Hard Drive
CD ROM Drive
Internal Modem
RS 232 / 4 port PCI adapter
